Commerce Funds

TICKER SYMBOL	CFGRX	CUSIP	200626406	INCEPTION DATE	12/12/94
---------------	-------	-------	-----------	----------------	----------

FUND OBJECTIVE Seeks capital appreciation. The Fund pursues this objective through investment in equity securities of companies with the potential for above-average growth in earnings.

GROWTH FUND UPDATE

The large cap growth market continued its rally in July and August, however, retraced some of the gains in September due to continued uncertainty regarding COVID-19 and an increased focus on the upcoming presidential election. For the third quarter, The Commerce Growth Fund's return of 10.73% underperformed the Russell 1000 Growth Index of 13.22%. The Fund's security selection and asset allocation both detracted from performance.

Stock selection was the main detractor from the Fund's relative performance. Not owning Tesla Inc. (1.24%) until the end of the quarter, which was up 98.65%, hurt performance. Weak stock selection in Jack Henry & Associates, Inc. (0.98%) and Armstrong World Industries, Inc. (0.0%) which were down -11.41% and -12.04% hurt performance. In addition, the Fund had a 1.58% underweight position in Apple Inc., (10.19%) up 27.22% for the quarter, while the Index had a 11.09% position which further detracted from performance. The Fund's top contributors were Rollins, Inc. (0.97%) which was up 28.02% for the quarter and being underweight the Index position to Microsoft Corporation (8.69%) which was only up 3.60%.

The Fund's sector allocations slightly detracted from relative performance as well. The Fund's 2.41% underweight to the Consumer Discretionary sector, the best performing sector returning 20.64%, hurt performance. However, the 2.44% overweight to the second-best performing sector, Materials, up 15.04% for the quarter helped performance. The Materials sector represents 3.26% of the Index.

TOTAL RETURNS (%) AS OF 9/30/20

Lipper Category: Large-Cap Growth Funds

** Returns for periods over one year are annualized. The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. To obtain the most recent month-end returns, please visit our website at <https://commercefunds.com/fund-information/fund-performance>.

10-Year	★★★	out of 813 funds

NOTES

1. The Net Asset Value represents the assets of the Fund (ex dividend) divided by the total number of shares.
2. The Russell 1000 Growth Index is an unmanaged index that measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The Index figures do not reflect any deduction for fees, expenses or taxes. It is not possible to invest directly in an unmanaged index.
3. The Lipper Category 2nd Quartile Total Return Ranking represents the lowest performing fund in the second quartile within the respective Lipper investment category.
4. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. Diversification does not protect an investor from market risk and does not ensure a profit.
5. The total annual operating expenses of the Funds, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations), are as set forth above. In the case of the Value, Growth, Bond, Short-Term Government, National Tax-Free Intermediate, Missouri Tax-Free Intermediate and Kansas Tax-Free Intermediate Funds, the Adviser has contractually agreed to limit each Fund's total annual operating expenses (excluding interest, taxes and extraordinary expenses) until March 1, 2021. After that date, the Adviser or a Fund may terminate the contractual arrangement. A Fund's total annual operating expenses may increase without shareholder approval. Percentages may not sum to 100% due to rounding.
6. The price-earnings ratio (PE Ratio) is the market value per share of a company, divided by its earnings per share (EPS). The PE Ratio is used as a measure of valuation of a company's stock price.

A basis point (bp) is equal to 1/100th of 1%, or 0.01% (0.0001). For example: 1% change = 100 basis points, and 0.01% = 1 basis point.

FOOTNOTES

The Fund invests in mid-capitalization securities. The securities of mid-capitalization companies involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements.

* Russell 1000 Growth Index

**** The Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They are net of expenses and assume reinvestment of all distributions at net asset value. Because the Fund is not subject to a sales charge, such a charge is not applied to their Total Returns.**

*** Lipper Analytical Services, Inc. is an independent publisher of mutual fund rankings, records rankings for these and other Commerce Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on total return at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return.

**** The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. ©2020 Morningstar, Inc.
