Commerce Funds

TICKER SYMBOL	CFSTX	CUSIP	200626109	INCEPTION DATE	12/12/94
---------------	-------	-------	-----------	----------------	----------

FUND OBJECTIVE

Seeks current income consistent with preservation of principal. The Fund pursues this objective primarily through investment in short-term obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities.

SHORT-TERM GOVERNMENT UPDATE

Economic contraction continued with Gross Domestic Product (GDP) dropping an annualized -0.6% for the second quarter and -1.1% for the first half of 2022. Full year GDP estimates center around 1.5% with the housing market continuing to slow along with consumer spending. Many economists predict a recession by the second half of 2023.

Inflation, as measured by the Consumer Price Index (CPI), peaked at 9.1% in June and then fell to 8.3% for August. The Federal Reserve (Fed) remained committed to pulling inflation back towards its 2.0% target with two consecutive 75 basis point increases to the federal funds rate during the quarter. Federal funds ended the quarter at 3.25% with the bond market forecasting a rate of 4.25% by year-end.

U.S. Treasury yields moved sharply higher over the quarter in response to the Fed action, stubborn inflation reports, and robust job creation. In the third quarter the yield on the two-year treasury bond jumped over 132 basis points to end at a surprising 4.27%. The five-year Treasury yield rose above 4.00% for the first time since 2007.

For the third quarter, the Commerce Short Term Government Fund's return of -2.52% underperformed the Bloomberg 1-5 Year Government Index return of -2.23%. The Fund's relative overweight to mortgages detracted from performance. The Fund's shorter duration relative to that of its benchmark contributed to performance.

As the Fed raises interest rates to pull inflation down to its 2.0% target, concern about the occurrence of a recession grows. We believe that more Fed rate hikes are expected in the coming quarter, weaker employment reports, lower inflation readings, and slower wage growth need to be seen by the Fed before it can slow down the current tightening cycle.

TOTAL RETURNS (%) AS OF 9/30/22

Lipper Category: Short U.S. Government Funds

* Returns for periods over one year are annualized. The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. To obtain the most recent month-end returns, please visit our website at <https://commercefunds.com/fund-information/fund-performance>.

NOTES

1. The Net Asset Value represents the assets of the Fund (ex dividend) divided by the total number of shares.
2. Duration is the method of determining a bond's price sensitivity, given changes in interest rates.
3. Bloomberg U.S. 1-5 Year Government Bond Index measures the performance of U.S. dollar-denominated U.S. Treasury bonds, government related bonds (i.e., U.S. and non-U.S. agencies, sovereign, quasi-sovereign, supranational and local authority debt) and investment grade U.S. corporate bonds that have a remaining maturity of greater than or equal to one year and less than five years.
4. The Lipper Category 2nd Quartile Total Return Ranking represents the lowest performing fund in the second quartile within the respective Lipper investment category.
5. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

This fund has not been rated by an independent rating agency. Commerce may receive credit quality ratings on the Fund's underlying securities from at least one of three major rating agencies - S&P, Moody's and Fitch. The underlying security may be unrated but deemed by Commerce to be of comparable quality. Commerce develops the credit quality breakdown by taking the highest rating if more than one agency rates a security. Commerce will use a single rating if that is the only one available. Securities that are not rated by the agency are reflected as such in the breakdown. Commerce converts all ratings to the equivalent S&P major rating category when illustrating the Fund's credit rating breakdown. Ratings and portfolio credit quality may change over time. Unrated securities do not necessarily indicate low quality, and for such securities the investment adviser will evaluate the credit quality.

Non-Rated (NR) includes holdings of securities not rated by any major rating agency. Unrated securities held in the fund may be of higher, lower, or comparable credit quality to securities that have a credit rating from a Nationally Recognized Statistical Rating Organization (NRSRO). Therefore, investors should not assume that the unrated securities in the fund increase or decrease the fund's overall credit quality. Percentages may not sum to 100% due to rounding.

6. The total annual operating expenses of the Funds, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations), are as set forth above. In the case of the Value, Growth, Bond, Short-Term Government, National Tax-Free Intermediate, Missouri Tax-Free Intermediate and Kansas Tax-Free Intermediate Funds, the Adviser has contractually agreed to limit each Fund's total annual operating expenses (excluding interest, taxes and extraordinary expenses) until March 1, 2023. After that date, the Adviser or a Fund may terminate the contractual arrangement. A Fund's total annual operating expenses may increase without shareholder approval.
7. The method of calculation of the 30-Day Standardized Subsidized Yield is mandated by the Securities Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price of the Fund ("POP") per share on the last day of the period. This number is then annualized. The 30-Day Standardized Subsidized Yield reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders. The 30-Day Standardized Unsubsidized Yield does not adjust for any fee waivers and/or expense reimbursements in effect. If the Fund does not incur any fee waivers and/or expense reimbursements during the period, the 30-Day Standard Subsidized Yield and 30-Day Standardized Unsubsidized Yield will be identical.

A basis point (bp) is equal to 1/100th of 1%, or 0.01% (0.0001). For example: 1% change = 100 basis points, and 0.01% = 1 basis point.

Economic and market forecasts presented herein reflect our judgment as of the date of this presentation and are subject to change without notice. These forecasts do not take into account the specific investment objectives, restrictions, tax and financial situation or other needs of any specific client. Actual data will vary and may not be reflected here. These forecasts are subject to high levels of uncertainty that may affect actual performance. Accordingly, these forecasts should be viewed as merely representative of a broad range of possible outcomes. These forecasts are estimated, based on assumptions, and are subject to significant revision and may change materially as economic and market conditions change. Commerce has no obligation to provide updates or changes to these forecasts. Case studies and examples are for illustrative purposes only.

FOOTNOTES

Investments in fixed income securities are subject to the risks associated with debt securities including credit and interest rate risk. The guarantee on U.S. government securities applies only to the underlying securities of the Fund if held to maturity and not to the value of the Fund's shares. Mortgage-backed securities are subject to prepayment risks, which may result in greater share price volatility. Asset-backed securities may be less liquid than other securities and therefore more difficult to value and liquidate, if necessary.

*** The Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They are net of expenses and assume reinvestment of all distributions at net asset value. Because the Fund is not subject to a sales charge, such a charge is not applied to their Total Returns.**

** Lipper Analytical Services, Inc. is an independent publisher of mutual fund rankings, records rankings for these and other Commerce Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on total return at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return.

*** The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. ©2022 Morningstar, Inc.
