

Fund Objective: Seeks current income exempt from federal, and to the extent possible, from Kansas income taxes, consistent with the preservation of capital. The Fund pursues this objective through investment primarily in municipal securities exempt from regular federal income tax, federal alternative minimum taxes, and Kansas income tax.

TOTAL RETURNS (%) AS OF 9/30/17

10 Yrs.*	3.63	4.42	3.46

Lipper Category: Other States Intermediate Muni Debt Funds

* Returns for periods over one year are annualized. The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. To obtain the most recent month-end returns, please visit our website at www.commercefunds.com/fund_is_SharePerf.shtm.

The Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They are net of expenses and assume reinvestment of all distributions at net asset value.

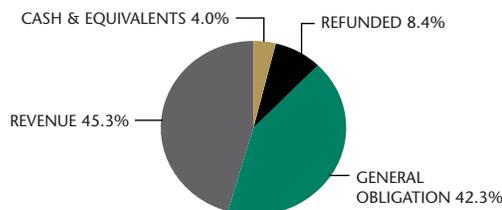

Investments in fixed-income securities are subject to the risks associated with debt securities including credit and interest rate risk. When interest rates rise, the prices of bonds and therefore the value of the fixed income mutual fund shares can decrease and an investor can lose principal value. The Fund is non-diversified. Due to the smaller number of bonds generally held in the portfolio, the Fund may be subject to greater risks than a more diversified fund. A change in the value of any single holding may affect the overall value more than it would affect a diversified fund that holds more investments. In addition, the Fund's investments may subject shareholders to federal alternative minimum tax. The investment income from this Fund may be subject to state income taxes.

KANSAS TAX-FREE INTERMEDIATE BOND UPDATE

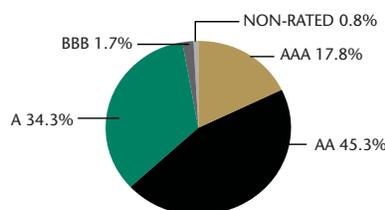

The quarter began with the Illinois House voting to override Gov. Bruce Rauner's vetoes of a budget package, giving the state its first spending blueprint in more than two years and ending the nation's longest fiscal stalemate since at least the Great Depression. Stocks continued to climb during the third quarter amid escalating tensions with North Korea. Markets appeared to shrug off three major hurricanes making landfall during the final month of the quarter as well. The Federal Reserve announced that it would begin to normalize its balance sheet and investors drew their focus to the prospect of lower corporate tax rates. Municipal Bonds (Munis) continued their strong performance for the quarter. The 10-year Treasury yield increased 3bps from 2.30% to 2.33% while the 10-year municipal yield increased 4bps from 1.96% to 2.00%. The 10-year muni/treasury ratio rose slightly to 86%, supported by the backdrop of lower supply and healthy fund flows. Longer bonds outperformed shorter bonds and general obligation bonds outpaced revenue bonds by 4bps during the quarter. Lower quality bonds beat higher quality counterparts.

For the third quarter, the Fund underperformed its benchmark and its peer category. The Fund's exposures to the higher education, lease, and housing sectors hampered returns as did the higher-quality issues. Maturities greater than 12 years detracted while the hospital and power sectors were additive.

Lipper Total Return Rankings — Lipper Analytical Services, Inc. is an independent publisher of mutual fund rankings, records rankings for these and other Commerce Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on **total return** at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return.

MORNINGSTAR RATINGS

Muni Single State Interm Funds Category as of 9/30/17

Overall ★★★	out of 148 funds
3-Year ★★	out of 148 funds
5-Year ★★★	out of 136 funds
10-Year ★★★	out of 119 funds

Morningstar Risk-Adjusted Ratings: The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics, including all sales charges. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Past performance is not a guarantee of future results.

Notes:

1. The Net Asset Value (NAV) represents the assets of the Fund (ex dividend) divided by the total number of shares.
2. Duration is the method of determining a bond’s price sensitivity, given changes in interest rates.
3. The Bloomberg Barclays 3-15 Year Blend Index is an unmanaged index comprised of investment-grade municipal securities ranging from 2 and 17 years in maturity. The Index figures do not reflect any deduction for fees, expenses or taxes. It is not possible to invest directly in an unmanaged index.
4. The Lipper Category 2nd Quartile Total Return Ranking represents the lowest performing fund in the second quartile within the respective Lipper investment category.
5. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund’s entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

This fund has not been rated by an independent rating agency. Commerce may receive credit quality ratings on the Fund’s underlying securities from at least one of three major rating agencies - S&P, Moody’s and Fitch. The underlying security may be unrated but deemed by Commerce to be of comparable quality. Commerce develops the credit quality breakdown by taking the highest rating if more than one agency rates a security. Commerce will use a single rating if that is the only one available. Securities that are not rated by the agency are reflected as such in the breakdown. Commerce converts all ratings to the equivalent S&P major rating category when illustrating the Fund’s credit rating breakdown. Ratings and portfolio credit quality may change over time. Unrated securities do not necessarily indicate low quality, and for such securities the investment adviser will evaluate the credit quality.

Non-Rated (NR) includes holdings of securities not rated by any major rating agency. Unrated securities held in the fund may be of higher, lower, or comparable credit quality to securities that have a credit rating from a Nationally Recognized Statistical Rating Organization (NRSRO). Therefore, investors should not assume that the unrated securities in the fund increase or decrease the fund’s overall credit quality. Percentages may not sum to 100% due to rounding.

6. The total annual operating expenses of the Funds, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations), are as set forth above. In the case of the Value, Growth, Bond, Short-Term Government, National Tax-Free Intermediate, Missouri Tax-Free Intermediate and Kansas Tax-Free Intermediate Funds, the Adviser has contractually agreed to limit each Fund’s total annual operating expenses (excluding interest, taxes and extraordinary expenses) until March 1, 2018. After that date, the Adviser or a Fund may terminate the contractual arrangement. A Fund’s total annual operating expenses may increase without shareholder approval.
7. The method of calculation of the 30-Day Standardized Subsidized Yield is mandated by the Securities Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price of the Fund (“POP”) per share on the last day of the period. This number is then annualized. The 30-Day Standardized Subsidized Yield reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders. The 30-Day Standardized Unsubsidized Yield does not adjust for any fee waivers and/or expense reimbursements in effect. If the Fund does not incur any fee waivers and/or expense reimbursements during the period, the 30-Day Standard Subsidized Yield and 30-Day Standardized Unsubsidized Yield will be identical.

A basis point (bp) is equal to 1/100th of 1%, or 0.01% (0.0001). For example: 1% change = 100 basis points, and 0.01% = 1 basis point.
